

## City of Yakima Vehicle Collisions by Collision Type 1998-2000

This map identifies reported vehicle collisions by street intersections for the years 1998-2000. Map symbols for total number of collisions by collision type have been sized by Rate of Million Entering Vehicles (MEV). This technique facilitates analysis of street intersections which have high rates of collisions by possible causes of collisions.

Collisions by Type

- Rear End
- Broad Side
- Approach Turns
- Side Swipe
- Other
