Release Date: Friday, March 9th, 2018

Crack Sealing Project to Impact Traffic on Summitview

A project involving "crack sealing" will impact traffic along a portion of Summitview Avenue on from Monday, March 12th through Friday, March 16th.

City of Yakima crews will be filling cracks along the section of Summitview from 40th Avenue to 48th Avenue from March 12th to March 16th. Work on the project will take place from 8:00 am to 3:00 pm each day.

Traffic restrictions will be in place while the project is underway. Traffic will be restricted to one lane in each direction in the project area.

Crack sealing is one of the most inexpensive forms of road maintenance and is an effective method of preventing water from penetrating the roadbed and causing further damage including, most notably, potholes. Cracks caused by fatigue, changes in temperature, regular traffic use, etc. are first cleaned using pressurized air. Cracks are then filled with an asphalt emulsion, thereby preserving not only the roadbed, but the pavement adjacent to the cracks.

Drivers are reminded that the speed limit through all traffic-related works zones within the City of Yakima is 20 miles-per-hour.

During the project, traffic delays in the area are likely to occur. Drivers should use alternate routes until the project is completed.

Access to homes and businesses in the project area will be maintained as best as possible.

As always, the schedule for this type of a project is subject to change daily dependent on weather, equipment failure, and emergencies.

For additional information about this project, contact Streets and Traffic Operations Manager Joe Rosenlund at 576-6430.
