HOW LONG HAVE YOU LIVED IN YAKIMA? 11 years

B. Available for day meetings: **Available for evening meetings:**

C. Please describe (in 200 words or less) your reasons for seeking a position on the Yakima City Council, and why you believe you can represent the citizens of Yakima as a Council member.

I believe that if you want to live in a great society you need to participate in its governance. I believe that public service is one of the finer callings a citizen can have. I wish for my children to live in a community of opportunity, justice, and continuing improvement. It's evolutionary. Towns and cities that cannot change, that are stuck in a 20th century paradigm, will stagnate and die under the inability to solve the problems of today by using stale failed tools over and over again.

Many towns and cities have been innovative in finding solutions to intractable problems. We do not need to reinvent the wheel over every problem we face. Economic justice is a ground up process. I feel you cannot short circuit this with trickle down ideology.

I know my neighbors wish to see their neighborhood not fall victim to slow urban decay led by crime and greedy absent landlords. My neighbors and the people of greater Yakima needs to build a platform for citizen voices to be heard and new ideas and directions for our families to live in.

I will bring the experience, desire, and drive to help grow Yakima into a jewel of the Northwest.

D. Please give any training or experience that you possess which would be beneficial to the position you are

Washington State Department of Ecology Training sessions including: ethics, public disclosure and diversity to environmental negotiations, facilitator training and public involvement.

Washington State University and Green River Community College: Course work in Land Use and Landscape Ecology, wetland function and critical area laws and regulations.

Owner of GaiaSense helping land owners secure development rights and environmental protection.

Weyerhaeuser Paper Company: Training in multiple disciplines from statics, and project management to experimental design and communication.

Washington State University M.S. and Stockton State College B.S.: major course work in environmental planning and urban landscapes, environmental science chemistry etc., to minor in communication and television production.

E. Have you ever served as a city council member or as a member of a city board or commission? If so, please list city, state and dates of service:
