(Please contact City staff if you have questions on applicability.)

- a. A scaled site plan including the location of off-street parking as well as onsite water and sewer infrastructure. Also include the location and number of disabled parking spaces and whether the lot is paved or unpaved. A current aerial photo *may* substitute the site plan requirement if the existing parking configuration can be deciphered from the aerial and if the new use does not change the required number of parking spaces or utility layout.
- b. A scaled floor plan which identifies the use of each room in the building.
- c. A complete application for Type 1, 2, or 3, depending on zoning designation.

Please be advised that changes in occupancy of an existing building often trigger accessibility requirements such as accessible parking spaces, an accessible building entrance, and other items. Improvements that require permits may also trigger accessibility requirements in an existing building.
