Pretreatment Sample Port Application

Occupancies that discharge strong waste to the City of Yakima Wastewater Treatment Plant must comply with Chapter 7.65 of the Yakima Municipal Code.

This checklist outlines the process for submitting an application for review and approval for the installation of sample ports.

- ➔ A Sample Port Application form may be submitted by the tenant, property owner and/or Contractor, however the permit can only be issued to the property owner or a licensed Contractor.
- ➔ Sewer installations must be performed by a State Licensed Contractor who is also a licensed City of Yakima licensed Side Sewer Installer.
- ➔ Please submit: 1) the completed Application form; 2) indication of which of the Sampling Manhole Standard Details will be used for the installation and 3) a utility site plan. The application will be routed to the Wastewater Pretreatment Supervisor for review. The review time period is up to 10-days.
- ➔ If you have any questions regarding the sample port location requirements, please contact the Wastewater Pretreatment Supervisor at 509-575-6077.
- ➔ If additional information is required in order to complete the review, the applicant will be contacted by the Code Administration Permit Project Coordinator and/or the Wastewater Pretreatment Supervisor.
- ➔ Once the application is approved, the Permit Project Coordinator will notify the applicant that the permit is ready to be issued.
- ➔ At the time the permit is issued a copy of the approved sample port plan will be given to the applicant. The approved plan must be on site at the time inspections are performed by the Office of Code Administration.
- ➔ Work performed within the City Right-of-Way, require the submittal and approval of an Excavation / Street Break Permit Application pursuant to Chapter 8.72 Yakima Municipal Code (<http://www.yakimawa.gov/services/engineering/files/StreetBreak-October720142.pdf>). If you have questions regarding this process, please contact City Engineering at 509-575-6111.
- ➔ All work performed must be inspected before backfilling. In the event the work is backfilled without the required inspection(s), the owner/applicant will be responsible for exposing the work and scheduling the required inspection(s) to ensure the installation complies with applicable codes.

Declaration

I hereby certify that (please select one):

- I am a **CONTRACTOR** or SPECIALTY CONTRACTOR currently registered and properly licensed as defined under RCW 18.27.010 and 18.27.110 and am legally qualified to perform the work sought by this permit.
- I am an **AUTHORIZED AGENT** of the property owner and all work will be done by the property owner or a properly licensed contractor or specialty contractor as defined under RCW 18.27.010 and 18.27.110 and is legally qualified to perform the work sought by this permit.
- I am **EXEMPT** from the requirements of the Contractor Registration laws, per RCW 18.27.090, and will abide by all provisions and conditions of the exemption as stated. I will do all of my own work or use all registered and licensed contractors and/or specialized contractors in connection with the work to be performed under the permit applied for herein.

I hereby certify under penalty of perjury of the Laws of the State of Washington that I have read and examined this application and know that the information contained herein is true and correct. I understand that the granting of a permit does not authorize me in any way to violate or cancel any of the provisions of state, federal or local laws regulating the construction or performance of construction sought under this permit.
