SHORELINES

Shorelines are all of the water areas of the state, including reservoirs, and their associated shorelands, together with the lands underlying them; except (i) shorelines of statewide significance; (ii) shorelines on segments of streams upstream of a point where the mean annual flow is twenty cubic feet per second or less and the wetlands associated with such upstream segments; and (iii) shorelines on lakes less than twenty acres in size and wetlands associated with such small lakes.

The following are exempt from requiring a Shoreline Development Permit, as per RCW 90.58.030:

1. Normal maintenance or repair of existing structures or developments, including damage by accident, fire, or elements;
2. Construction of the normal protective bulkhead common to single-family residences;
3. Emergency construction necessary to protect property from damage by the elements;
4. Construction and practices normal or necessary for farming, irrigation, and ranching activities...;
5. Construction or modification of navigational aids such as channel markers and anchor buoys;
6. Construction on shorelands by an owner, lessee, or contract purchaser of a single-family residence for his own use...;
7. Construction of a dock, including a community dock, designed for pleasure craft only

Talk to a City Planner: Before preparing your application, you may wish to have a City Planner review your proposal. The City offers “Pre-Application” meetings in which you can gain a better understanding of the review process and potential requirements for your project from various City departments before you formally submit your land use application and pay the application fee. More information and instructions for applying for a Pre-Application meeting can be found online: <https://www.yakimawa.gov/services/planning/pre-application/>.

Submit Your Application: A completed application on forms provided by the Planning Division is required along with an Application Fee and a Site/Preliminary Plat Plan. Once you have submitted the application, a Planner will be assigned to process your application.

Development Service Team (DST): Representatives from City departments, State agencies, and private utility companies will review your proposal. Should significant concerns arise during the DST meeting, a conference may be scheduled between you and the appropriate agency in order to discuss possible application modifications. After the DST meeting, you may have an opportunity to change aspects of your proposal to address any concerns raised. Based on the information provided (including modified information), a staff report will be prepared for the Administrative Official who has the ability to approve, approve with conditions, or deny the request.

Additional Information: During the review process, the Administrative Official may request additional/more detailed information. He may defer his decision until the requested information is provided.

Notice of Application: A copy of your site/preliminary plat plan and other pertinent information will be mailed to the applicant/owner and all property owners within 300 feet of the subject property. The applicant must post the property with any required City supplied signs at least 20 days prior to the decision being issued. This notice provides the public an opportunity to submit written comments on the proposal during a 20-day comment period.

Decision: The Administrative Official will issue a decision for approval, approval with conditions, or denial.

Appeal the Decision?: The Administrative Official’s Decision is final unless appealed. The zoning ordinance allows for appeals of the decision, which may include part or all of the written decision. Appeals of Administrative Official decisions must be filed on forms provided by the City along with an appeal fee within 14 days of the date of mailing of the decision. If you are dissatisfied with the written decision, discuss your views with your Planner.

Conditions of Approval: Approval of your project may contain specific requirements that must be met prior to the City signing and you recording your plat. These requirements may include frontage improvements to the street such as the construction of new curb, gutter, sidewalks, right-of-way dedication, and street lights, which must be installed *or* financially secured (City Engineer approval required).

All public improvements must be installed or provisions must be made with the City Engineer for a financial method to assure the construction of the required public improvements before your project is completed. You may be required to complete some of the conditions prior to building permits being issued.

SITE PLAN CHECKLIST & INSTRUCTIONS

A Detailed Site Plan Is Required: On August 8, 1996, the City Council passed a resolution (No. R-96-91) adopting a requirement that all site plans submitted in conjunction with any building permit application, land use application, and environmental application shall contain certain information and be approved by the appropriate Division Manager. All information that is applicable to your proposal shall be checked off and clearly displayed on the site plan. It is in the applicant's best interest to provide a carefully drawn and scaled site plan with all required information. The decision on whether or not to grant approval of your development proposal is largely based on the information you provide. **An application cannot be processed until an adequate site plan is submitted.**

Please complete this checklist and include it with your site plan. The site plan must contain all pertinent information. Items not applicable to the proposed project shall be noted.

- 1) **Use Ink:** Use blue or black permanent ink. It may be helpful to draft the site plan in pencil then trace over in ink. Ink is necessary for adequate duplication.
- 2) **Use A Straight Edge:** All lines must be straight and done with the aid of a ruler or other straight edge. Use a compass when delineating circular drawings such as cul-de-sacs. Computer drafted site plans are acceptable.
- 3) **Draw To Scale:** Site plans shall be drawn to scale. The site plan template has a suggested map scale of one inch equaling twenty feet (1"=20'). Distances on the map must be as representative of reality as possible. For example, if the distance from a structure to a property line is 20 feet, the distance on the site plan will be 1 inch.
- 4) **Use Site Plan Checklist:** Use the site plan checklist and provide all applicable information on the site plan.
- 5) **Fill In Information On The Site Plan Template.** The template is available online on the Planning Division webpage (<https://www.yakimawa.gov/services/planning/>) in the "application forms and fees" section, and also at the permits counter on the 2nd floor of City Hall. If you choose not to use the city's site plan template, please provide the information listed on the site plan template (background info, lot coverage, parking, etc.) on your site plan.

Note: You may benefit from the aid of a professional in the preparation of a site plan.
