Subject: Yakima Comprehensive Plan 2050 Update and Environmental Impact Statement

Dear Yakima Planning Commission,

Please prepare a full EIS before adopting the Comprehensive Plan 2050 Update. It seems imperative for the future of our community and your responsibility to take care of our future generations' inheritance.

Given the significant potential impacts on public health, water resources, agriculture, natural environment, and our local economy, I beg the City to withdraw its Determination of Non Significance (DNS), issue a Determination of Significance, and prepare a full Environmental Impact Statement (EIS) under SEPA.
